

Mission

MRS is a forward-looking company who doesn't disregard the past.

Like that we achieve an improvement for the future with the experiences of the past.

During our work we always keep an eye on the environment, so we can leave it in an even better condition to our next generation.

Quality is our concern. Only if the quality is right, a buyer becomes a satisfied customer.

Employees are comfortable to work at MRS and are trained continually to fulfill the technical and customer's requirements.
